

October 2020: This list supersedes all previous editions of the complete and supplementary BEIC lists.

LIST OF DEFRA APPROVED DISINFECTANTS EXCLUDING PHENOLICS

As at 19 October 2020

FOR USE ON LION APPROVED LAYING SITES

APPROVED BY

Department of Environment, Food & Rural Affairs (DEFRA)

(For the purposes of The Diseases of Animals (Approved Disinfectants) (England) Order 2007)

Extracted from the DEFRA list of proprietors and dilution rates as at 19 October 2020

The following table lists all of the disinfectants that **DO NOT** CONTAIN PHENOLS. The disinfectants that are listed have an approved dilution rate, for both General Orders (e.g. salmonella control) and for diseases of poultry. Any approved disinfectants that had no dilution rate shown for both of these two Orders have been excluded, as the following table is applicable to the poultry industry (or more specifically, the commercial egg industry) only.

The left column shows the category/type of disinfectant. This is not included in the DEFRA tables and whilst every effort has been made to ensure the accuracy of this column, this cannot be guaranteed.

October 2020: This list supersedes all previous editions of the complete and supplementary BEIC lists.

IMPORTANT NOTES FOR LION APPROVED FARMS, WHERE EGGS FOR HUMAN CONSUMPTION ARE PRODUCED:

- ***Is the disinfectant that you use listed here? It should be. IF IT IS NOT LISTED, DO NOT USE IT.*** Either it may not be DEFRA approved or it is a phenolic disinfectant.
- This is a list of DEFRA approved disinfectants that are suitable for use **on farms that produce eggs for human consumption.**
- ***It is known that some phenolic disinfectants have caused detectable taints in eggs.*** Even the vapour from diluted phenolic disinfectants can taint eggs. In an egg, as little as 0.08 parts per billion of an ingredient that was likely to be in phenolic disinfectants can cause a taint that is detectable by 50% of the people eating it. Therefore **phenolic disinfectants (even new generation ones) must not be used on Lion Approved egg laying sites, including those sites where egg laying forms only part of the poultry enterprise, e.g. rearing and laying on the same site.**
- **You should seek technical help on which are the best disinfectants for your use.**
- DO NOT STORE DISINFECTANTS, DETERGENTS OR ANY OTHER CHEMICALS NEAR TO EGGS OR EGG TRAYS.
- ***All chemicals, when not in use, must be stored in a locked chemical store that is well separated from egg handling areas.***

ADDITIONAL NOTES on the DEFRA list are:

- ***A dirty surface must be cleaned before it can be satisfactorily disinfected, because dirt may make the disinfectant useless.***
- ***Users are reminded that many of the products listed will contain hazardous chemicals and the COSHH regulations will apply.***
- ***Use all disinfectants according to the manufacturers' health and safety recommendations on the label and / or data sheet. Wear the recommended personal protective equipment.***
- ***Spraying disinfectants results in whole body exposure. Use the personal and respiratory protective equipment recommended by the supplier. Avoid exposing unprotected people (e.g. lorry drivers, bystanders etc.) to disinfectant spray.***
- ***Details of suppliers of approved products may be obtained directly from the proprietors.***

October 2020: This list supersedes all previous editions of the complete and supplementary BEIC lists.

N.B. * = The number of millilitres to one gram of disinfectant.

All other disinfectants are measured as: Number of Parts of Water to One Part of Disinfectant

Every effort has been made to make this document as accurate as possible. However, the BEIC can not guarantee the accuracy of the information. If any disinfectants have been inaccurately described or unintentionally omitted, a supplementary list will be sent out by the BEIC following a request to do so. Likewise if it can be shown that a non-phenolic product has been approved as being suitable by DEFRA but awaits the publication of a revised list by them, this can be added to the BEIC supplementary list.
